## **Prak-ASD**

## Modul 10

## Latihan

1) mennjumlahkan bilangan 1 sampai n dengan cara pertama

2) pengukuran kinerja dengan menandai waktu diawal eksekusi dan di akhir eksekusi

3) mennjumlahkan bilangan 1 sampai n dengan cara kedua

4) Pengukuran kinerja insertion sort menggunakan average case, wors case, best case

5) Analisis kode python

```
Python 3.7.6 Shell
                                                                             П
